# CALGUARD NOZZLE DIP GEL

Prevents Spatter Adhering to Sensitive Components

### DESCRIPTION

CalGuard Nozzle Dip Gel is an advanced, non-toxic, nozzle dip gel for the prevention of spatter adhering to sensitive components of welding torches. Including the interior and exterior of MIG nozzles, the end and outer surfaces of contact tips and positional and fixtures.

### **FEATURES & BENEFITS**

- Non-toxic, making it user friendly
- Ready to use without any mixing
- Controlled usage, allowing for no wastage
- Silicone free paintable
- Ideal for steel, aluminium and alloys

### DIRECTIONS FOR USE

- 1. Ensure the nozzle is clean and free from weld spatter before starting.
- 2. Replace the worn components before starting
- 3. Start to weld briefly to heat the nozzle.
- 4. When the nozzle is hot dip it into the Cal-Guard gel.
- 5. Drain any excess gel off if necessary.
- 6. Continue to re-dip the nozzle into the gel to maintain an even coat, do this as required.
- 7. Avoid the build-up of Cal-Guard Nozzle Dip Gel in the diffuser by storing the torch in a downward direction when not in use.

### PHYSICAL PROPERTIES

Specific Gravity:	0.82
Boiling Point:	>350°C
Flash Point (Deg C):	> 220 (PMCC)
Appearance:	Blue gel
Solubility in water:	Miscible
